

Federal Gas Tax Agreement in British Columbia 2018 Annual Expenditure Report

Acknowledgements

This Annual Expenditure Report covers the disbursements and expenditures of federal Gas Tax funding for the period of January 1 to December 31, 2018 and in accordance with reporting requirements outlined in Schedule D of the 2014-2024 Administrative Agreement on the Federal Gas Tax fund between Canada, the Province of British Columbia, and UBCM (Gas Tax Agreement or GTA). This report provides an overview of the projects reported by Ultimate Recipients in 2018, and includes the results of the annual UBCM Gas Tax Audit (Appendix B), the Financial Report Table (Appendix A) and a detailed list of all projects reported in 2018 (Appendix C).

Gas Tax Fund in British Columbia

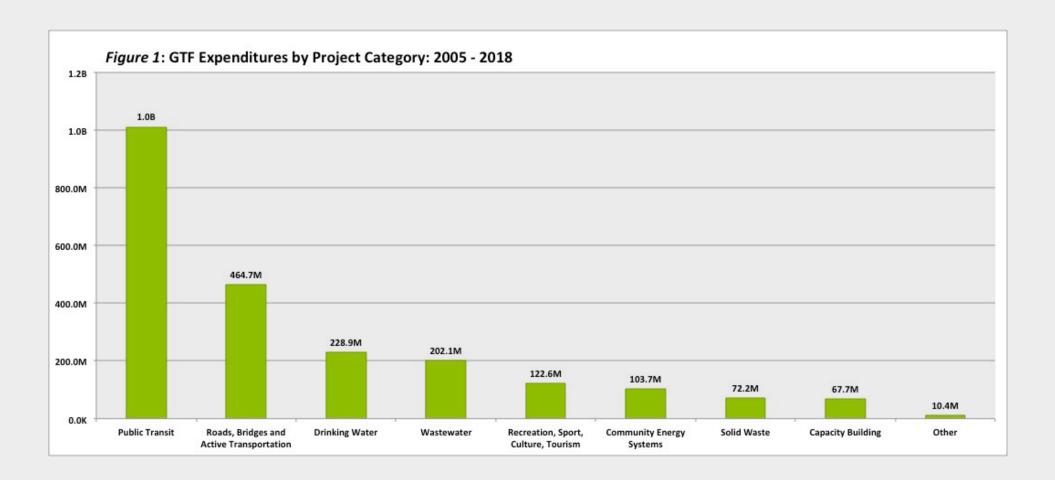

The federal Gas Tax Fund (GTF) in British Columbia provides local governments with stable, predictable and dedicated funding for capital infrastructure and capacity building projects. Annually, the GTF in BC delivers a direct, per capita transfer of \$110 million to 189 local governments and allocates and additional \$140 million to transit projects in Metro Vancouver and \$30.6 million to application based funding across the province (Figure 4).

Since the programs inception in 2005, local governments in BC have spent nearly \$2.1 billion of Gas Tax Funds on 5,300 individual projects. Over \$1.5 billion has been invested into roads and public transportation initiatives; \$430 million invested into drinking water and waster water projects; and \$68 million invested in local capacity building projects (Figure 1). In 2018, 1,003 Gas Tax projects were reported.

The federal Gas Tax Fund in BC works to attain program outcomes of a cleaner environment, stronger cities and communities and productivity and economic growth.

District of Lake Country Wastewater Treatment Plant Building

Program Background

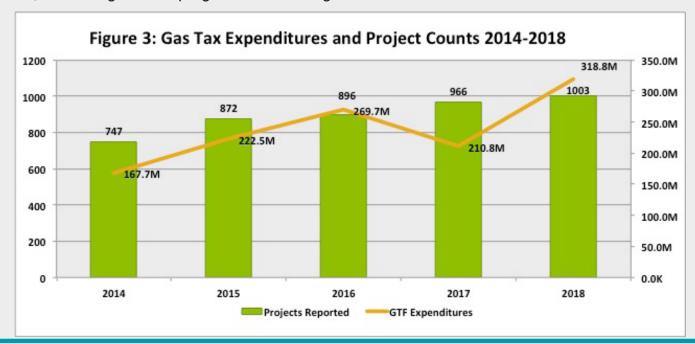

2018 marks the fifth year of the ten-year Federal Gas Tax Agreement and the 14th year of Gas Tax Funding in British Columbia. In 2011, the GTF became a permanent source of local government funding through Section 161 of *Keeping Canada's Economy and Jobs Growing Act*, which set \$2 billion of federal funding annually for transfer to provinces and territories.

In BC, the GTF helps build communities by providing local governments with direct, stable and predictable funding that can be directed to locally prioritized infrastructure needs.

The commitment to funding by the federal government has allowed the GTF program in BC to grow in spending and project counts on an almost annual basis, confirming that the program is continuing to make an impact on the local government infrastructure landscape and becoming a reliable source of funding for communities throughout the province.

In 2018 alone, local governments have reported spending on record number of projects – a trend which is anticipated to continue through 2019 with the one-time doubling of the Gas Tax Fund which occurred in spring of 2019.

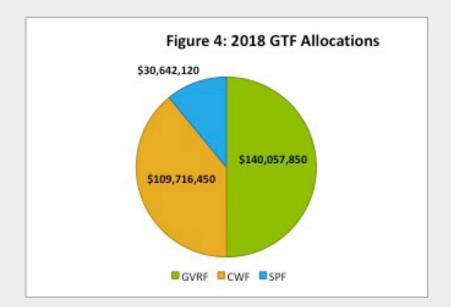

Further, with the continued significant investment in environmentally sustainable public transportation infrastructure in the Metro region, GTF spending has increased by over 50% from 2017.

Program Administration and Funding Streams

UBCM administers the Gas Tax Fund on behalf of Canada and British Columbia and reports annually to Canada on expenditures, disbursements and project details. Over the term of the Agreement (2014-2024), UBCM will oversee the transfer of more than \$3 billion of federal funding to local governments in BC and eligible recipients for infrastructure and capacity building projects.

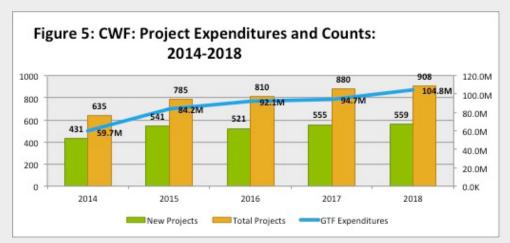

The federal Gas Tax Fund is delivered through three program streams: the Community Works Fund (CWF); the Strategic Priorities Fund (SPF); and the Greater Vancouver Regional Fund (GVRF).

Community Works Fund

CWF is available to all local governments in British Columbia and is based on a per capita funding formula with a funding floor and delivered twice annually. Local governments make local choices about which eligible projects to fund and report annually on these projects and their outcomes. In 2018, Gas Tax Program Services delivered \$109.7 million of Community Works funding to local governments.

Community Works Funding was made available to all incorporated local governments in BC in 2014 with the inclusion of Metro Vancouver member municipalities. Since then, 2,933 CWF projects have been reported. These projects account for \$435 million in GTF investment. The number of CWF projects reported annually continues to grow, as do total project expenditures. 2018 saw the largest number of CWF projects reported, 908, and the highest level of CWF expenditures at \$105 million (Figure 5).

Strategic Priorities Fund

The Strategic Priorities Fund is an application-based program available to local governments and other recipients outside of Metro Vancouver to support infrastructure and capacity building projects that are either large in scale, regional in impact or innovative, and align with the program objectives of productivity and economic growth, a clean environment and strong cities and communities.

In 2018, 25 SPF projects reported spending \$15.6 million of Gas Tax funds. By 2024, the Gas Tax Fund in BC will deliver approximately \$300 million to more than 175 SPF projects.

Additionally, 53 other application-based projects were reported in 2018 with total GTF spending of \$42.5 million. This figure includes all other application-based programs administered under the GTF program including the Innovations Fund, the Regionally Significant Projects Fund, and the General Strategic Priorities Fund. In total, application based projects reported in 2018 have invested \$103 million of Gas Tax funding into locally significant infrastructure and planning projects.

Greater Vancouver Regional Fund

The GVRF provides funding for regional transportation investments within the Metro Vancouver Regional District and its member municipalities. Projects are proposed for funding by TransLink and approved by the Metro Board. In 2018, 17 projects expending \$155 million were reported under the GVRF program. To date, these projects represent \$449 million in Gas Tax investments towards public transportation infrastructure in the Metro Vancouver region.

By 2024, the GVRF will allocate over \$1.5 billion in transportation investments that benefit Metro Vancouver and its member municipalities.

Gas Tax Program Highlights

In accordane with Schedule D of the Gas Tax Agreement, by September 30th each year, UBCM is required to provide an annual report to Canada on Gas Tax disbursements, expenditures and a detailed project list covering the previous calendar year. The 2018 the Financial Report Table is found in Appendix A, the UBCM Gas Tax Audit is found in Appendix B and the Reported Project List is found in Appendix C of this report.

Village of Port Clements Upgrade to Water Distribution System

Summary of Reporting Period

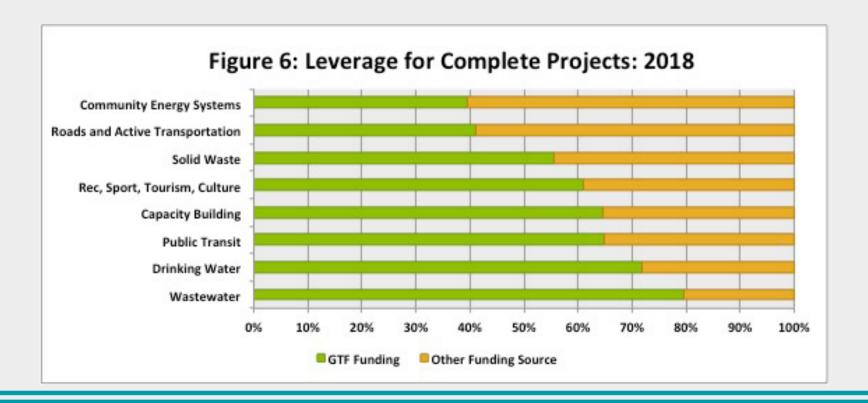

In 2018, 167 local governments reported spending \$318.7 million on 1,003 Gas Tax funded projects. Both the number of projects reported and the total spending amount has increased over previous years. UBCM expects this amount to increase again in 2019 as a result of the one-time top-up. The estimated total cost of projects reported in 2018 is over \$1.6 billion. Public Transit (50%), Roads, Bridges and Active Transportation (19%), and Recreation and Sport (10%) infrastructure projects received the highest levels of investment. While Recreation and Sport (29%), Roads, Bridges and Active Transportation (23%), and Capacity Building (15%) had the highest project counts.

Table 1

Investment Category	Total GTF Spending	Projects Reported	Complete Projects
Public Transit	\$160,238,011	36	12
Local Roads, Bridges and Active Transportation	\$59,434,856	231	127
Recreation, Sport, Culture, Tourism	\$32,244,062	288	180
Wastewater	\$28,327,078	80	33
Drinking Water	\$16,446,830	107	48
Solid Waste	\$7,832,295	25	16
Capacity Building - Long Term Infrastructure Planning, Asset Management, Integrated Community Sustainability Planning	\$6,686,077	154	63
Other (Broadband Connectivity, Disaster Mitigation, Regional Local Airports, Brownfield)	\$3,889,437	15	4
Community Energy Systems	\$3,656,185	67	42
	\$318,754,831	1003	525

Since 2014, investment in the Recreation, Sport, Culture and Tourism categories has steadily increased. In 2018, these investments accounted for the highest number of reported projects (288) and third highest level of investment (\$32 million). The increase in investment corresponds with a significant decrease in the number of Community Energy System projects reported. This shift in investment is directly related to reclassifying projects based on asset location instead of project details. As an example, where the replacement of a boiler in a community arena was previously categorized as Community Energy, now it is considered a Recreation or Sport Infrastructure project.

Gas Tax funding continues to be an important source of funding for local government projects. On average, for every \$100 of infrastructure investment reported, Gas Tax funds account for \$53 with \$47 coming from a different funding source. Wastewater and drinking water projects have the highest ratio of GTF contribution, which shows that the fund helps local government accomplish program objectives. With the one-time top up arriving in 2019, we expect the Gas Tax Fund to be leveraged to an even greater degree.

Local Roads, Bridges Active Transportation

In 2018, 89 local governments expended \$59.4 million undertaking 230 road and active transportation infrastructure projects. The total number of projects reported and spending remained the same from the previous reporting year. Investment in road infrastructure has consistently been one of the top categories since the GTF took effect.

Road infrastructure projects reported in 2018 represent \$109 million in cumulative GTF spending and have an estimated total project cost in excess of \$395 million. 127 projects were reported as complete, the average leverage for complete projects is for every \$100 of Gas Tax funds invested, \$144 is input from other sources.

Projects reported in 2018 worked to improve or construct over 294 kilometers of local roads, bridges and active transportation infrastructure that benefits more than three million British Columbians. Additional outputs from road infrastructure projects includes: improvements to 14 bridges, 29 manhole and catch basin units installed, 6 roundabouts constructed, improvements to 47 intersections and cross walks and the installation or replacement of 815 streetlights.

Local Roads, Bridges and Active Transportation 2018 Output			
Paved Road (km)	156		
Sidewalk (km)	39		
Bicycle lane (km)	54		
Multi-use Pathway (km)	46		
Sewer, Storm, Water, Open Ditch (km)	18		
Street Lighting (#)	815		
Bridge (#)	14		
Roundabout (#)	6		
Curbs and gutters (km)	19		
Catch basins (#)	29		
Pedestrians/Bicycle Crossing (#)	57		

Project Profile Local Roads & Bridges City of Dawson Creek

Following an engineering study that warned its 10th Street Bridge was at risk of washing out following historic flooding, the City of Dawson Creek used Federal Gas Tax Funds to construct a replacement bridge. The original 55-year-old crossing was closed in 2015 to vehicles weighing more than 12,000 kilograms, requiring fire trucks, maintenance vehicles and fully-loaded school and transit buses to detour to other crossings. The new bridge provides improved service for pedestrians and cyclists through the addition of an additional sidewalk and dedicated bike lanes.

Project Profile Local Roads & Bridges Capital Regional District

The Gas Tax Fund has provided critical funding for the construction of the first two phases of the E&N Rail Trail – Humpback Connector through the Capital Region. This multi-use trail is being constructed largely within the rail corridor and links the City of Langford, Town of View Royal, Esquimalt Nation, Songhees Nation, Township of Esquimalt and City of Victoria. Currently, 12 km of the trail is complete and open for public use, expanding the CRD's regional trail network to nearly 100 km. The most recent phase of the work included the construction of a pedestrian and cycling bridge at Hereward Road. The trail received about 400,000 visits in 2018.

Wastewater and Storm Water Collection

In 2018, 46 local governments undertook 81 wastewater infrastructure projects, totalling expenditures in excess of \$28 million, a significant increase in expenditures when compared to 2017. 33 projects were completed, while 46 projects were initiated. Wastewater projects reported in 2018 represent \$150.7 million in estimated total project cost. The average leverage for a complete wastewater project, for every \$100 of Gas Tax funds, \$25 comes from additional revenue sources. Wastewater projects rely most heavily on the Gas Tax for project funding.

Projects improved treatment for 74,000m³ of wastewater everyday. Overall, wastewater projects benefit a population of 194,336 British Columbians and support 977 kilometers of storm sewer networks and 1,248 kilometers of sanitary sewer networks.

City of Abbotsford Sludge Pump Station

Project Profile Storm Water Systems District of Coldstream

The District of Coldstream used Gas Tax Funds to create a surface flow constructed wetland to remove nitrate-N from several groundwater seepages that were flowing into Coldstream Creek. The constructed wetland was built on a former pasture site within the creek floodplain, and is contained by berms to prevent flooding. The design objective was to reduce nitrate-N concentrations from >10 mg/L to levels that are within the BC guidelines for aquatic life protection. This low maintenance system relies on gravity flow through the constructed wetland. Cattail was the primary plant species at construction, and other native species are colonizing the wetland.

Infrastructure	Output
Wetland Treatment (#)	3
Pumps (#)	4
SCADA Systems (#)	21
Generators (#)	3
Sewage Lagoon (#)	5
Wastewater Outfalls and Disposal Plant (#)	4

Culverts (#)	10

Infrastructure	Output
Curbs and Gutters (m)	700
Open Storm Ditch (#)	3
Storm Sewer (m)	6,175

Project Profile Wastewater, Storm Water and Water Systems Regional District of Easy Kootenay

The Gas Tax Fund was a key contributor to the financing of a Regional District of East Kootenay project to upgrade the sanitary, storm and water infrastructure, along with roadwork improvements at a highway crossing in the community of West Fernie. The completed project includes the rehabilitation of approximately 4.1 kilometres of potable water mains, approximately 3.4 kilometres of sanitary sewer and 3.3 kilometres of stormwater mains, and repaving of all the roads.

The upgraded water system replaces one that was over 50 years old and in deteriorating condition. The new sanitary sewer system provides new service deliver that allows 200 homes

Drinking Water

In 2018, 47 local governments undertook 107 drinking water infrastructure projects with GTF investments in excess of \$16.4 million. These projects represent \$91.3 million in estimated total project cost, and to date, have expended \$45.8 million of Gas Tax funds. On average, drinking water projects account for 10% of spending and total projects on an annual basis.

36 drinking water infrastructure projects were reported complete in 2018. The average leverage for complete projects is for every \$100 of Gas Tax funds invested, \$39 comes from an alternate funding source.

Drinking water infrastructure projects made improvements to 8,320m3 of clean water storage. Improvements were made to 3,640 drinking water connections, while overall, drinking water projects benefit populations in excess of 363,359 and support over 3,233 kilometers of drinking water transmission main. In 2018, 35% of projects generated new drinking water infrastructure while 65% of projects replaced, enhanced or improved existing infrastructure. Drinking water projects reported in 2018 can also claim the following outputs:

- 8 boil water advisories rescinded
- · 37.8 kilometers of drinking water main improved or installed
- 1,992 residential and commercial water meters installed
- 72 fire hydrants installed
- 12 pressure reducing valve stations and 19 pump stations improved or installed
- Installation of 36 SCADA systems at various locations.

Infrastructure	Output
Treatment Facilities (#)	7
Filtration or Treatment Systems (#)	13
Water Reservoir (m ³)	6,279
Water Storage Tank (m ³)	231
Water Towers (#)	1
Local Water Pipe (m)	6,862
Transmission Pipe (m)	30,993
Water System Intakes (#)	3
Aquifers/Water Source (#)	4
Water Well (#)	24

Hydrants (#)	72
Pumps (#)	6
Water Meters (#)	1,992
PRV's/Shutoffs (#)	12
Generators (#)	2
SCADA Systems (#)	36
Surge Tank (#)	1
Boil Water Advisory Removal (#)	6

Project Profile Water Systems Columbia Shuswap Regional District

The Columbia Shuswap Regional District used Federal Gas Tax funding to construct a water treatment system in the community of Sunnybrae. The new system lifted a long-standing boil water advisory that had been in place for nine years following its abandonment by a private owner. Through a new deep-water intake in Shuswap Lake, the plant treats raw water with UV light and chlorine and is monitored with a new SCADA system. Improvements were also made to increase the system's capacity for handling fire flows through the installation of a new pumping station and water main extension.

Community Energy Systems

In 2018, 31 different local governments undertook 67 community energy projects, expending \$3.7 million. Projects reported this year represent \$14.3 million in estimated total project cost and over \$6.1 million of GTF investment to date. In 2018, 42 projects were reported as complete, the average leverage for complete community energy system projects is, for every \$100 of Gas Tax Funds invested, \$156 comes from an alternate funding source.

Community energy system projects reported in 2018 achieved the following outputs:

Infrastructure	Project Output
Transmission Grid	1
Solar Energy	5
Biomass	2
Heat Recovery Loop	1
Building Envelope Components	16
Lighting	24
Power Plant Components	35

Community energy system projects reported in 2018 can claim the following outcomes:

- 270,304 kWh of clean energy produced annually
- 5 solar panel energy systems installed, totalling over 500 kW of panels

District of Lake Country Hydroelectric Generating Station

- 30 municipal buildings connected to solar, bioenergy, or energy loop systems
- 52 municipally owned buildings receiving upgrades to power plant or building envelope components

Project Profile Community Energy Systems District of Hudson's Hope

The District of Hudson's Hope has used federal Gas Tax funds to install 1,550 solar panels to power its facilities. The array generates 510 kilowatts of clean energy annually to service 22 local government buildings and facilities. Hudson's Hope won a 2018 Community Excellence Award in the service delivery category for creating BC's largest local government solar project and making Hudson's Hope the most-solarized community per capita in the province. The project has reduced electrical consumption for its solar supplied facilities by 60%.

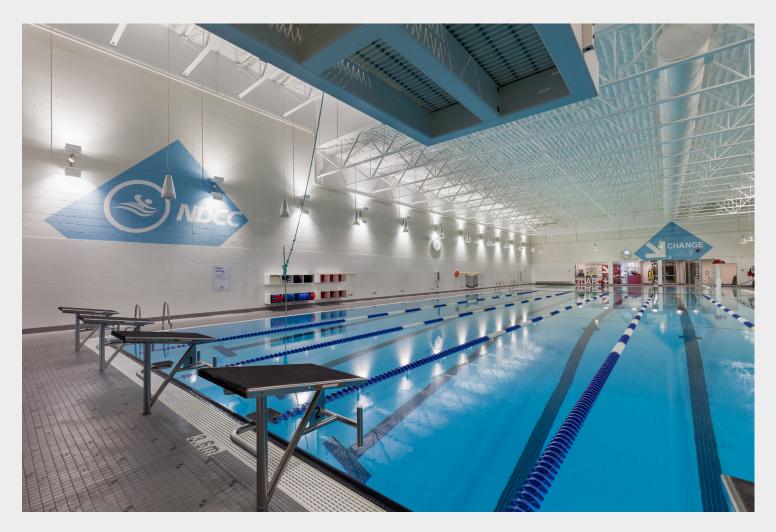

Recreation, Sport, Tourism and Cultural Infrastructure

In 2018, 79 local governments worked on 288 sport, recreation, culture and tourism infrastructure projects in their communities. Recipients spent \$32.4 million on the four investment categories combined, with recreation infrastructure accounting for \$27.4 million in spending and 81% of projects, while sport, culture and tourism infrastructure projects account for \$4.8 million in spending 19% of projects reported. 65% of the projects undertaken in these categories improved the building, surface or space where the recreation, culture or tourism activity takes place, while 35% of the projects improved the technology, equipment and lighting that supports the facilities.

To date, these projects represent \$62.6 million of GTF investment and estimated total project costs in excess \$295 million. 180 projects were reported complete in 2018; the average leverage of a complete project is for every \$100 of GTF investment, \$63 is from additional sources.

Table 5: Sport and Recreational Infrastructure Output

Infrastructure	Output
Indoor Recreation or Sport Facilities	86
Outdoor Recreation or Sport facilities	83
Campgrounds	5
Marina, Dock or Boat Launch	11
Recreational Paths and Trails (km)	88.5
Cultural Centres, Community Centres and Performing Arts Facilities	60
Libraries	8
Museums, Archives and Art Galleries	10
Tourist Facilities	16

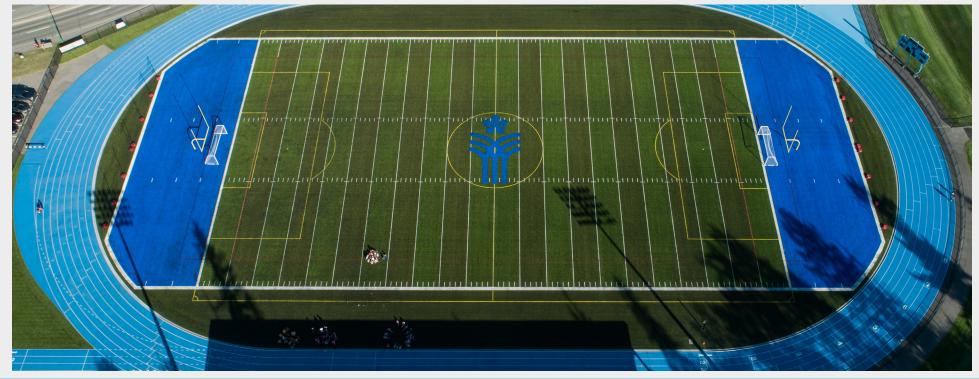

Central Kootenay Regional District Pool Renewal

Project Profile Recreational Infrastructure City of Prince George

The Masich Place Stadium in Prince George was built to host the BC Summer Games in 1990. With many elements within the original design reaching the end of their life expectancy, the City used Federal Gas Tax funds to install a new synthetic turf field and resurfaced an 8-lane track surrounding the field. The new field will host university soccer, high school football and rugby games, and now meets playoff standards for western and national championship events. The turf field is anticipated to have a life expectancy equal to four natural grass fields.

Solid Waste Management

In 2018, 13 local governments undertook 25 solid waste infrastructure projects totalling \$7.8 million in spending and serving a total population of 172,421. To date, these projects represent \$11.7 million of GTF investment and estimated total project costs in excess \$20.2 million.

16 solid waste infrastructure projects were reported as complete in 2018. The average leverage for complete projects is for every \$100 of Gas Tax funds invested, \$79 comes from an alternate funding source.

Solid waste infrastructure projects can claim the following outputs for 2018:

Infrastructure	Output
Waste Collection Buildings	1
Waste Transfer Station and Assets	4
Waste Collection Assets	5
Rolling Stock	1
Landfill Compactor	3
Landfill Decommissioning	1
Leachate Collection	3
Building	1
Dump Site	1
Recycling Collection Building	6
Composting Facility	4
Organics Management Systems	1

City of Kamloops Recycling Truck

Cowichan Valley Regional District Meade Creek Recycling Facility

Project Profile Solid Waste Management Cowichan Valley Regional District

The renewal and expansion of Cowichan Valley Regional District's (CVRD) Bings Creek Recycling Centre plays a critical role in achieving the goals of the region's Solid Waste Management Plan. The CVRD currently recycles or composts about 64% of the approximately 94,000 tonnes of waste that it handles each year. The facility at Bings Creek – one of several constructed or upgraded through the Gas Tax Fund - recycles a broad spectrum of organic, electronic, chemical and solid waste materials. Upgrades to the building increased its receiving capacity and saw the installation of a new compactor, improved leachate containment and new wash down systems.

Cowichan Valley Regional District Bings Creek Transfer Station

City of Chilliwack Bailey Landfill Optimization

Regional and Local Airports, Broadband Connectivity and Disaster Mitigation

In 2018, roughly 2% of reported GTF projects and investments were directed towards regional and local airports, broadband connectivity, brownfield remediation and disaster mitigation infrastructure projects. Although small in total investment, the number of projects and levels of expenditures in these four categories has increased since 2014, when the eligibility categories were expanded.

Highlights from projects reported in 2018 include:

- Broadband and fibre optic network installation in three municipalities;
- Improvements to two airport runways and one airport terminal building;
- Remediation of one brownfield site that will contain supportive housing units;
- Improvements to four dikes, two dams and the construction of one overflow channel.

Town of Smithers Regional Airport Terminal Building Modernization

Investment Category	Reported Projects	2018 GTF Spending	Total GTF Spending to Date	Estimated Project Cost
Broadband Connectivity	3	\$206,168	\$756,740	\$1,015,822
Disaster Mitigation	8	\$654,413	\$710,990	\$5,267,771
Regional and Local Airports	4	\$2,996,567	\$3,470,048	\$5,580,125
Brownfield Redevelopment	1	\$92,289	\$92,289	\$92,289

Public Transit

GTF recipients expended a total of \$160.1 million on public transit infrastructure in 2018, with TransLink accounting for \$155.9 million of investment and \$615 million in estimated total project costs. Outside of the Metro Vancouver region, fourteen local governments worked on eighteen different public transit infrastructure projects expending a total of \$4.2 million on projects valued at more then \$22.3 million.

Project outputs for public transit investments in 2018 include:

- 813 buses purchased or replaced
- One Sea Bus
- · 114 Sky Train Cars Replaced
- · Six public transit stops installed or improved
- Improved transit experiences for over 200,000 riders
- Deployment of four new electric battery powered buses and two on-route charging stations

Project Profile Transit Systems City of West Kelowna

The City of West Kelowna has used Federal Gas Tax funding to build capacity within the Central Okanagan bus rapid transit (BRT) system. The project saw the addition of new BRT stations—along Highway 97, linking Queensway Town Centre with the Westside and Westbank Town Centres, with elements such as roadway pullouts, platforms, bus shelters and ancillary furniture, equipment, signage, lighting and landscaping. The project also saw the construction of a transit exchange and a park-and-ride facility near the intersection of Westgate Road and Highway 97. Transit ridership in the Central Okanagan transit system has increased from 4.3 million to 5.2 million annually between 2012 and 2018 due in part to the increased capacity provided by the BRT system.

Greater Vancouver Regional Fund

Electric Buses and Charging Stations

The new TransLink battery-electric buses have provided both environmental and customer benefits.

Each battery-electric bus is expected to reduce 100 tonnes of GHG emissions per year, compared to diesel. They also do not generate any tailpipe emissions, helping keep the air clean. The buses are smoother and quieter than diesel buses providing a better rider experience.

Further, the buses are highly energy efficient. Using clean electricity for BC's grid, TransLink expects each bus to save up to \$40,000 in fuel costs for the two-and-a-half year project, compared to diesel.

Double Decker Buses

The first double-deckers will service the 301 Newton Exchange/ Richmond Brighouse station and the 620 Bridgeport/ Tsawwassen Ferry Terminal. The 555 Lougheed Station/ Carvolth Exchange route will be added January 2020.

Customers travelling on a double-decker will benefit from:

- Almost double the seats of a highway coach
- Plug-in USB charging outlets
- Panoramic views from the upper deck
- A wide, well-lit staircase with handrails to maximize safety
- A screen allowing customers to see vacant seats before going upstairs
- · Full accessibility with a low floor and boarding ramp

The addition to TransLink's fleet not only improves capacity on their busier long-haul routes, but also provides a unique experience to TransLink customers.

The addition of the double-decker buses to the fleet is made possible by contributions from the Federal Gas Tax GVRF (90 percent), and TransLink (10 percent).

Capacity Building Asset Management, Integrated Community Sustainability and Long-Term Infrastructure Planning

In 2018, 57 local governments expended \$6.67 million on 154 Capacity Building projects. These projects benefit populations totalling 1.47 million people across the province and have a significant impact on small and rural jurisdictions. In communities of 10,000 people or fewer, Gas Tax funds account for 80% of funding for completed capacity building projects. Regional Districts account for 31% of projects submitted under the capacity building investment category.

Investment Category	2018 Project Count	2018 Expenditures
Asset Management	52	\$2,612,143
Integrated Community Sustainability Planning	46	\$2,278,097
Long-Term Infrastructure Planning	56	\$1,795,837

Long-Term Infrastructure Planning projects represent 36% of projects and 27% of spending in the capacity building category. These projects help local governments develop master plans for wastewater, drinking water, road, and transportation services as well as GHG reduction strategies, air quality plans, energy and water conservation plans and drought management plans.

Integrated Community Sustainability Planning (ICSP) projects represent 30% of projects and 34% of spending in the capacity building category. Beyond creating and enhancing ICSP's, these projects help local governments advance regional growth strategies and community development plans.

Asset Management projects aim to increase local government capacity to undertake asset management planning practices. Within the capacity building investment category, asset management projects account for 34% of projects and 39% of spending.

Local Government Outreach

As part of UBCM's commitment to increasing outreach for the Gas Tax program, staff travelled to one convention and one conference to deliver Gas Tax Fund presentations to representatives and elected officials from local governments regarding the future grant opportunities and on-going Asset Management requirements under the renewed GTF. In 2018, the Gas Tax program staff attended the events listed in the table below.

List of Gas Tax Outreach Events in 2018				
Event	Date	Outreach		
2018 UBCM Convention	September 10-14	Meetings		
Asset Management BC - Conference	September 26-27	Presentation and Panel Session		

Local Government Outreach

Each summer UBCM staff conducts face-to-face meetings with local governments from every region of the province. These meetings offer local government staff a chance to discuss current and future opportunities using Gas Tax funds. From July to September of 2018, UBCM staff met with the local governments listed in the table below.

List of Local Government Meetings in 2018		
City of Colwood	District of 100 Mile House	Township of Esquimalt
Cariboo Regional District	District of North Saanich	Fraser-Fort George Regional District

Recipient Communications

During the reporting period, UBCM worked with recipients of Federal Gas Tax funding in British Columbia to fulfill the aims of the Communication Protocol (Schedule E) within the administrative agreement.

Local governments used a variety of means to raise awareness among residents of the investments provided by the Government of Canada through the GTF, including media events, news releases, social media, and dedicated content posted to websites.

In 2018, UBCM strengthened its capacity to capture data on signage installations in BC that build awareness of federal investments through the program. Through the reporting period 3 temporary construction signs were installed.

Local governments highlighted the following projects along with federal, provincial and UBCM involvement over the past year:

Recipient	Project
Thompson Nicola Regional District	Westwold Hall Upgrades
Squamish Lillooet Regional District	Pemberton Soccer Field
Village of Queen Charlotte	Boat Launch Upgrade
Squamish Lillooet Regional District	Pemberton Soccer Field
Town of Ladysmith	Wastewater Treatment
City of Victoria	Johnson St. Bridge
Cowichan Valley Regional District	Meade Creek Recycling Centre Completion
District of Lake Country	New Recreational Centre
Village of McBridge	Sanitary and Storm Sewer Upgrades
District of North Cowichan	Asset Management Project
City of Nelson	Water Sources Integration & Treatment
District of Oak Bay	Heat Transfer System
District of Peachland	Trepanier Creek Water System Upgrade
qathet Regional District	Water System Upgrade
Regional District of Kootenay Boundary	Dam Spillway Construction

Recipient	Project
City of Prince George	Masich Place Stadium
Okanagan Basin Water Board	Supply & Demand Study
Alberni Clayoquot Regional District	Landfill Diversion
Central Coast Regional District	Centennial Pool Renewal
Central Coast Regional District	Denny Island Water System
District of Clearwater	Asset Management Planning
District of Coldstream	Kalamalka Road Path
Capital Regional District	SEAPARC Leisure Complex Expansion
Columbia Shuswap Regional District	Saratoga Water System Upgrade
District of Squamish	Squamish River Dike Upgrades
Village of Kaslo	Sewer Expansion
Village of Granisle	Water Treatment Plant Construction
Village of Granisle	Asset Condition Assessment
Town of Golden	Kicking River Dike Upgrade
Town of Golden	Infrastructure Replacement Priority Plan
Village of Fruitvale	Sanitary Sewer Treatment Monitoring
Kitimat Stikine Regional District	Two-Mile Water System Upgrades
Regional District of Kootenay Boundary	Water System Acquisition Strategy
Regional District of Nanaimo	Wastewater Secondary Treatment Upgrade
Regional District of Nanaimo	Asset Management
Regional District of North Okanagan	Pat Duke Arena Improvements
Regional District of Okanagan-Similkameen	Wastewater Solids Processing Upgrade
Regional District of North Okanagan	Pat Duke Arena Improvements

Recipient	Project

Town of Creston	Bio-solids Handling System
City of Trail	Arena Roof Replacement
District of Wells	Community Energy System
Regional District of Okanagan-Similkameen	Wastewater Solids Processing Upgrade
Regional District of Okanagan-Similkameen	Asset Management

Asset Management

During the term of the Gas Tax Agreement, local governments are required to work to strengthen their asset management practices, in accordance with the Asset Management for Sustainable Service Delivery: A BC Framework. As part of this requirement, local governments are required to commit to asset management practices, and report on those activities to remain eligible for Community Works Funds.

In 2015, the Gas Tax Partnership Committee approved a multi-phased approach to measuring BC local governments progress on Asset Management.

The first phase for meeting asset management reporting requirements of the GTF was launched in 2016 with the collection of base-line data on asset management activities. A report on the aggregate results from the data collected in phase one was released in early 2017. Phase two requires local governments to develop implementation plans outlining where and how improvements in asset management will be achieved.

In 2017, to meet the Phase 2 requirements towards improvements in local government asset management practices, organizations were asked to complete an asset management commitment questionnaire. The purpose of this questionnaire was for local governments to identify commitments and/or describe planned improvements that moved them forward with strengthening asset management practices. The completion of this questionnaire required local governments to revisit the asset management baseline data they provided to UBCM in 2016 and use it to identify a path forward towards making incremental improvements in asset management over the 10 year Renewed Gas Tax Agreement.

As required in the 2014-2024 Administrative Agreement on the Federal Gas Tax Fund, a final Outcome Report must be submitted to the federal government by March 31, 2023. As part of that 2023 Outcome Report, local governments will be required to report on the progress they have made strengthening their asset management practices. This will involve the completion of a survey, similar to the 2016 Gas Tax Fund Asset Management Baseline Survey.

In the interim, it is expected that BC local governments are actively involved in strengthening their asset management practices and capacity through the development and implementation of asset management best practices. UBCM has been actively involved with Asset Management BC (www.assetmanagementbc.ca) in order to develop and provide resources, tools and training for local governments needing support in meeting their Gas Tax asset management requirements.

APPENDIX B RESULTS OF THE ANNUAL UBCM GAS TAX AUDIT

Administrative Agreement on the Federal Gas Tax Fund in British Columbia

Annual Expenditure Report – Federal Gas Tax Fund Receipts and Disbursements of

UNION OF BRITISH COLUMBIA MUNICIPALITIES

And Independent Auditors' Report thereon

For the year ended December 31, 2018

KPMG LLP PO Box 10426 777 Dunsmuir Street Vancouver BC V7Y 1K3 Canada Telephone (604) 691-3000 Fax (604) 691-3031

INDEPENDENT AUDITORS' REPORT

To the President's Committee of the Union of British Columbia Municipalities

Opinion

We have audited the Annual Expenditure Report - Federal Gas Tax Fund Receipts and Disbursements of Union of British Columbia Municipalities (the "Entity"), which comprise:

- the schedule of Federal Gas Tax Fund receipts and disbursements for the year ended December 31, 2018
- and notes to the annual expenditure report, including a summary of significant accounting policies

(Hereinafter referred to as the "Annual Expenditure Report").

In our opinion, the accompanying Annual Expenditure Report for the year ended December 31, 2018 of the Entity is prepared, in all material respects, in accordance with the financial reporting provisions described in Note 2 to the Annual Expenditure Report.

Basis of Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the "Auditors' Responsibilities for the Audit of the Annual Expenditure Report" section of our auditors' report.

We are independent of the Entity in accordance with the ethical requirements that are relevant to our audit of the Annual Expenditure Report in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter - Financial Reporting Framework

We draw attention to Note 2 in the Annual Expenditure Report, which describes the applicable financial reporting framework and purpose of the Annual Expenditure Report.

As a result, the Annual Expenditure Report may not be suitable for another purpose.

Our opinion is not modified in respect to this matter.

Responsibilities of Management and Those Charged with Governance for the Annual Expenditure Report

Management is responsible for the preparation of the Annual Expenditure Report in accordance with the financial reporting provisions described in Note 2 in the Annual Expenditure Report; this includes determining that the basis of accounting is an acceptable basis for the preparation of the Annual Expenditure Report in the circumstances, and for such internal control as management determines is necessary to enable the preparation of the Annual Expenditure Report that is free from material misstatement, whether due to fraud or error.

Those charged with governance are responsible for overseeing the Entity's financial reporting process.

Auditors' Responsibilities for the Audit of the Annual Expenditure Report

Our objectives are to obtain reasonable assurance about whether the Annual Expenditure Report as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Annual Expenditure Report.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Annual Expenditure Report, whether due to fraud or error, design and perform audit
 procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
 - The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

UNION OF BRITISH COLUMBIA MUNICIPALITIES

Notes to Annual Expenditure Report - Federal Gas Tax Funds Receipts and Disbursements

For the year ended December 31, 2018

1. Background:

On September 19, 2005, the Union of British Columbia Municipalities (the "UBCM"), the Government of Canada ("Canada") and the Province of British Columbia (the "Province") entered into the Agreement on the Transfer of Federal Gas Tax Revenues under the New Deal for Cities and Communities 2005 - 2015 (the "First Agreement"). The First Agreement was focused on achieving three environmental sustainability outcomes: reduced greenhouse gas emissions, cleaner water and cleaner air with reliable and predictable funding. The First Agreement resulted in contributions of \$635,599,000 to local governments and other eligible recipients in British Columbia from 2005/2006 to 2009/2010 through three delivery mechanisms: a Community Works Fund, a Strategic Priorities Fund and an Innovations Fund (collectively the "Gas Tax Fund"). On March 17, 2008, the First Agreement was amended to provide additional contributions of \$1,002,788,000 from 2011/2012 to 2013/2014.

The First Agreement provided funding for local governments and other eligible recipients in British Columbia for a variety of capital and planning projects. Eligible project categories included:

- (a) Public transit,
- (b) Community energy systems,
- (c) Solid waste management,
- (d) Water and wastewater; and
- (e) Capacity building.

Effective April 1, 2014, the UBCM, Canada and the Province entered into the Administrative Agreement on the Federal Gas Tax Fund in British Columbia (the "Agreement"). The First Agreement was terminated as of April 1, 2014, and the Gas Tax Fund was transitioned from the First Agreement to the Agreement. The Agreement builds on the First Agreement, and is focused on helping communities build and revitalize public infrastructure that supports national objectives of productivity and economic growth, a clean environment and strong cities and communities. The Agreement is effective until March 31, 2024.

UBCM administered the funding under both the First Agreement and the Agreement, and was responsible for reporting to Canada and the Province on the use of funding and outcomes achieved in accordance with the terms of the First Agreement and the Agreement.

UNION OF BRITISH COLUMBIA MUNICIPALITIES

Notes to Annual Expenditure Report - Federal Gas Tax Funds Receipts and Disbursements (continued)

For the year ended December 31, 2018

1. Background (continued):

Under the Agreement, the Gas Tax Fund continues to provide funding for local governments and other eligible recipients in British Columbia for a variety of capital and planning projects. In addition to the eligible project categories under the First Agreement, the Agreement includes the following new eligible project categories:

- (a) Local roads and bridges,
- (b) Highways,
- (c) Short-sea shipping,
- (d) Short-line rail,
- (e) Regional and local airports,
- (f) Broadband connectivity,
- (g) Drinking water,

- (h) Brownfield redevelopment,
- (i) Sport infrastructure,
- (j) Recreational infrastructure,
- (k) Cultural infrastructure,
- (I) Tourism infrastructure; and
- (m) Disaster mitigation.

2. Basis of accounting:

The Annual Expenditure Report - Federal Gas Tax Funds Receipts and Disbursements of UBCM (the "Annual Expenditure Report") has been prepared in accordance with the following recognition and measurement principles:

- (a) amount received from Canada and amount transferred to eligible recipients are recognized and measured on a cash basis of accounting; and
- (b) investment income and amount spent on administration costs are recognized and measured on an accrual basis of accounting.

The Annual Expenditure Report is not prepared in accordance with the presentation principles or the presentation of all the financial statements and related note disclosures required for a complete set of financial statements.

The Annual Expenditure Report is prepared for UBCM to meet its obligations under Section 8 of Annex B and Section 1 of Schedule D of the Agreement. As a result, the Annual Expenditure Report may not be suitable for another purpose.
