It's not just  
about cars...

A man in a blue vest and grey trousers is standing next to a white car, holding a hydrogen fuel nozzle. The car has a blue graphic of water droplets on its side. The station is a white and yellow hydrogen refueling station with the word "HYDROGEN" written vertically on the side. The background shows a covered parking area with a yellow sign with the number "2".

How do we decide where to  
put the stations?
