Since 2008, Bionera has been providing willow crop solutions to treat wastewater, improve soil conditions, prevent soil erosion, and utilize biosolids, while creating biomass that can be used to generate heat and electricity. Short-rotation willows crops have been used in Europe for 40 years. In Canada, Bionera is the leader in establishing commercial-scale willow plantations, with projects in BC, Alberta, Sask., and Oregon. This includes a 2019 mine reclamation project near Edmonton and a 1200 acre plantation for the City of Calgary, using the City's biosolids.
